Section 65-9-3, Mississippi Code of 1972, as amended, provides for the designation of a State Aid System by the several Boards of Supervisors in their respective Counties, with the consent and approval of the State Aid Engineer, to a total mileage not in excess of 23,312.80.

The law further provides that a State Aid Route may be extended into a municipality in order to make a convenient and orderly connection with the nearest paved or surfaced street or highway capable of carrying the traffic originating on or destined for such State Aid Route.

During the 1994 regular session, the Legislature passed and the Governor signed House Bill 1302 which included a revision of the formula by which mileage is allocated to the counties. The bill includes a hold harmless provision increasing the total mileage authorized to assure that no county will be allocated fewer miles than under the previous formula.

House Bill 1302 provides that mileage on the State Aid System shall be allocated to the Counties of the State in the following proportions:

One-third ($\frac{1}{3}$) shall be allocated to all Counties in equal shares;

One-third ($\frac{1}{3}$) shall be allocated to Counties based on the proportion that the total number of rural road miles in a County bears to the total number of rural road miles in all Counties of the State; and

One-third ($\frac{1}{3}$) shall be allocated to Counties based on the proportion that the rural population of the County bears to the total rural population in all Counties of the State, according to the latest federal decennial census.
